Subject Index of Volume 152

Abrasion
mechanisms of abrasive wear in lubricated contacts, 57
mechanisms of high temperature sliding abrasion of metallic materials, 151
Abrasive particles
the influence of impingement angle on the erosion of ductile metals by angular abrasive particles, 91
Adhesive wear
atmospheric characteristics in friction and wear of metals, 99
Atmospheric gas
a study of the cutting tool wear mechanism on the minor flank, 47
atmospheric characteristics in friction and wear of metals, 99

Boundary lubrication
the influence of oil properties on the fretting wear of mild steel, 171

Cavitation
cavitation erosion of substrates in disk drive component cleaning: an exploratory study, 75
Circulating fluidized bed combustors
erosivity of particles in circulating fluidized bed combustors, 201
Coal
numerical and experimental study of finned tube erosion protection methods, 1
Coatings
control of fretting friction and wear of roping wire by laser surface alloying and physical vapour deposition coatings, 127
Conical whirl instability
theoretical analysis on conical whirl instability of unloaded submerged oil journal bearings, 309
Contacts
mechanisms of abrasive wear in lubricated contacts, 57
Cr_2O_4 coating
friction and wear of Cr_2O_3 coatings in inorganic salt solutions, 161

Cutting tool
a study of the cutting tool wear mechanism on the minor flank, 47

Disk drive components
cavitation erosion of substrates in disk drive component cleaning: an exploratory study, 75

Elastohydrodynamics
multilevel solution of the elastohydrodynamically lubricated circular contacts problem Part 2: smooth surfaces results, 369
multilevel solution of the elastohydrodynamically lubricated circular contacts problem Part 1: theory and numerical algorithm, 351
Erosion
cavitation erosion of substrates in disk drive component cleaning: an exploratory study, 75
numerical and experimental study of finned tube erosion protection methods, 1
the influence of impingement angle on the erosion of ductile metals by angular abrasive particles, 91
Ethylene vinyl acetate
wear, tear and tensile failure of silica-filled ethylene vinyl acetate rubber, 111

Ferrography failure processes
ferrographic analysis of failure process in a full-scale journal bearing, 241
Finned tubes
numerical and experimental study of finned tube erosion protection methods, 1
Flow fields
the influence of the flow fields in slurry erosion, 223
Fretting
control of fretting friction and wear of roping wire by laser surface alloying and physical vapour deposition coatings, 127

the influence of oil properties on the fretting wear of mild steel, 171
Friction
atmospheric characteristics in friction and wear of metals, 99
control of fretting friction and wear of roping wire by laser surface alloying and physical vapour deposition coatings, 127
effect of working surface shape on power loss in taper roller bearings, 31
friction and wear of Cr_2O_3 coatings in inorganic salt solutions, 161
investigation of matching characteristics of important frictional materials with lubricant antiwear additives, 317
the friction coefficients between the steel rope and polymer lining in frictional hoisting, 21

Greenwood and Williamson contact model
application of the modified Greenwood and Williamson contact model for the prediction of thermal contact resistance, 263
Groove wear
a study of the cutting tool wear mechanism on the minor flank, 47

Hoisting
the friction coefficients between the steel rope and polymer lining in frictional hoisting, 21

Impingement angle
the influence of impingement angle on the erosion of ductile metals by angular abrasive particles, 91
Inorganic salt
friction and wear of Cr_2O_3 coatings in inorganic salt solutions, 161

Laser surface alloying
control of fretting friction and wear of roping wire by laser surface alloying and physical vapour deposition coatings, 127
Linear scratch tests
examination of silicon wear debris generated in a linear scratch test, 183
Lubrication
mechanisms of abrasive wear in lubricated contacts, 57

Metals
atmospheric characteristics in friction and wear of metals, 99
mechanisms of high temperature sliding abrasion of metallic materials, 151
the influence of impingement angle on the erosion of ductile metals by angular abrasive particles, 91
Multirecesses
performance characteristics of multirecesses hydrostatic/hybrid flexible journal bearings with membrane type variable flow restrictors as compensating elements, 279

Oils
the influence of oil properties on the fretting wear of mild steel, 171

Physical vapour deposition
control of fretting friction and wear of roping wire by laser surface alloying and physical vapour deposition coatings, 127
Polymer
the friction coefficients between the steel rope and polymer lining in frictional hoisting, 21

Roller skew
effect of working surface shape on power loss in taper roller bearings, 31
Roping wire
control of fretting friction and wear of roping wire by laser surface alloying and physical vapour deposition coatings, 127
Rubber
wear, tear and tensile failure of silica-filled ethylene vinyl acetate rubber, 111

Silica
wear, tear and tensile failure of silica-filled ethylene vinyl acetate rubber, 111
Silicon
examination of silicon wear debris generated in a linear scratch test, 183
Sliding
effect of working surface shape on power loss in taper roller bearings, 31

mechanisms of high temperature sliding abrasion of metallic materials, 151
some thoughts on sliding wear, 187
Sliding wear
sliding wear of cast-iron coatings and cast-iron-cast-iron pairs in lubricated contact, 253
Squeeze film behaviour
squeeze film behaviour between rotating porous circular plates with a concentric circular pocket surface roughness and elastic deformation effects, 301
Steel
the friction coefficients between the steel rope and polymer lining in frictional hoisting, 21
the influence of oil properties on the fretting wear of mild steel, 171
Surface roughness
internal surface roughness of cold pilgered zircaloy tubes, 327

Taper roller bearings
effect of working surface shape on power loss in taper roller bearings, 31
Tear
wear, tear and tensile failure of silica-filled ethylene vinyl acetate rubber, 111
Tensile failure
wear, tear and tensile failure of silica-filled ethylene vinyl acetate rubber, 111
Tool life
correlating tool life, tool wear and surface roughness by monitoring acoustic emission in finish turning, 395
Tool wear
correlating tool life, tool wear and surface roughness by monitoring acoustic emission in finish turning, 395
Tribology
mechansims of abrasive wear in lubricated contacts, 57
Turning
a study of the cutting tool wear mechanism on the minor flank, 47

Wear fracture
wear, tear and tensile failure of silica-filled ethylene vinyl acetate rubber, 111
Wear friction
wear and friction characteristics of mica-filled fibre-reinforced epoxy resin composites, 343
Wear
apparatus for chemomechanical wear studies with biaxial load and surface charge control, 383
